## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to a method of a gaming machine having a ticket printer, classified in class 273, subclass 139.
  - II. Claims 12-22, drawn to a method of operating a game machine on a global communication network, classified in class 463, subclass 40.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I does not require a game being on a global communication network. The subcombination has separate utility such as a method that does not require a ticket printer.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3714

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. During a telephone conversation with John Roethel Reg. No. 28,372 on May 13, 2003 a provisional election was made without traverse to prosecute the invention of I, claims 1-11.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 12-22 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 9 are indefinite because it is in improper Markush form. It is unclear as to which group(s) applicant considers to be encompassed therein. Alternative expressions are permitted if they present no uncertainty or ambiguity with respect to the question of scope or clarity of the claims. One acceptable form of alternative expression, which is commonly referred to as a Markush group, recites members as being "selected from the group consisting of A, B and C." See *Ex parte Markush*, 1925 C.D. 126 (Comm'r Pat. 1925).

***Claim Rejections - 35 USC § 102***

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

10. Claims 1-2, and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Rowe '907.

11. Rowe discloses a player a player participating in a conventional game of chance on a gaming machine and when the player achieves a predetermined arrangement of symbols during the play of the conventional game awarding a player by means of a printed ticket as recited in claim 1; the gaming machine is a slot machine as recited in claim 2; and the gaming machine is a video poker machine as recited in claim 4.

12. Claims 1-2, 4, and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelly '426.

13. Kelly discloses a player participating in a conventional game of chance on a gaming machine and from a randomly determined outcome rewarding a player by means of printed ticket

Art Unit: 3714

(ticket voucher) as recited in claim 9; the gaming machine is a slot machine as recited in claim 10; and the gaming machine is a video poker machine as recited in claim 12.

***Claim Rejections - 35 USC § 103***

14. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

15. Claims 3 and 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly '426.

16. Kelly discloses the claimed invention as discussed above except for the predetermined arrangement of symbols are three tickets symbols, a final hand, a final hand being a royal flush, a starting hand, and the starting hand is a ten high hand or lower as recited in claims 3 and 5-8. By having predetermined arrangement of symbols or specific outcomes (e.g. a final hand, a final hand being a royal flush, a starting hand, and the starting hand is a ten high hand or lower) is an obvious design choice wherein the particular predetermined arrangement used is a matter of design choice, wherein no stated problem is solved, or unexpected result obtained, by using the specific predetermined arrangement claimed versus the predetermined arrangement taught by the prior art. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the applicant's invention was made to modify Kelly to include predetermined arrangement of symbols are three tickets symbols, a final hand, a final hand being a royal flush, a starting hand,

Art Unit: 3714

and the starting hand is a ten high hand or lower, to provide game players a plurality of different opportunities to achieve a winning outcome.

***Conclusion***

17. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Dietz `175, Burns `269, Saunders `832, Stern `044, Gerrard `785, and Kelly `344, and `918 all disclose different prize redemption system using or incorporating cashless systems.
